

Legal deposit

Our nations' heritage

Legal deposit, which has existed in law since 1662, ensures that the published output of the UK and Ireland is collected, preserved and made available within the six legal deposit libraries for present and future generations. New [regulations](#) came into force on 6 April 2013 to extend legal deposit to materials published electronically and on the internet.

Print publications for legal deposit can be books, journals, sheet music, maps, plans, charts or tables. Electronic legal deposit also covers material published digitally such as websites, blogs, e-journals and CD-ROMs.

Electronic legal deposit

The six legal deposit libraries are collaborating to archive and provide seamless access to electronic legal deposit material, with a growing collection of more than 5 million e-books and e-journal articles. This is the first time that a collaborative effort on this scale has been achieved in the UK, Ireland and internationally between major library institutions.

More and more publishers are depositing electronic material, which can be accessed in each library in the same way. Electronic formats facilitate improved search capabilities within a document, which is not possible in printed publications. Material received electronically from publishers is saved in perpetuity by the legal deposit libraries and can be accessed on library premises only.

For more information on how to access and use electronic legal deposit at the National Library of Scotland, please see our [guide for Library members](#).
